## SPISY LUDNOŚCI WĘGORZEWA Z 1752 I 1754 ROKU

Węgorzewo należy do miast powstałych w okresie zasiedlania i zagospodarowywania terenów wschodnich Prus Książęcych<sup>1</sup>. Lokacja miasta miała miejsce w 1571 r., wcześniejsze pojawiające się zapisy o składaniu przysięgi przez rajców i ławników w 1450 r. są nieprawidłowe<sup>2</sup>. Działania osadnicze były koniecznością w budowaniu państwa, jeśli zważyć, że około 1570 r. 80% jego powierzchni pokrywały lasy<sup>3</sup>. Akcja była prowadzona intensywnie przez pierwszego władcę Prus Książęcych Albrechta von Brandenburg-Ansbach. W czasach jego panowania na Mazurach powstały 293 osady<sup>4</sup>.

Węgorzewo było miastem produkcyjnym, którego handel dotyczył głównie bezpośredniej okolicy, skupiając kupców z dalszych stron w okresie jarmarków. Jego rozwój przypadł głównie na wiek XVIII. Można to zaobserwować zestawiając wielkość populacji miasta (Tabela 1). Co ważne, rozwój ten następował pomimo dużych strat ludnościowych w czasie epidemii dżumy (1709–1711) czy nieurodzajów oraz panującej w 1750 r. zarazie bydła<sup>5</sup>. W ślad za rozwojem miasta następował wzrost jego znaczenia administracyjnego. W 1725 r. wydzielono spod archiprezbiteratu rastemborskiego okręgi węgorzewski i lecki, ustanawiając inspekcję węgorzewską<sup>6</sup>. W 1751 r. dokonano reformy sądownictwa, tworząc okręgi sądowe. W okręg kętrzyński połączono Barciany, Szestno i Węgorzewo<sup>7</sup>. W 1781 r. siedzibę okręgu przeniesiono do tego ostatniego miasta.

Zmienił się również wygląd miasta. Na mieszczańskich domach strzechę kryjącą dachy coraz częściej zastępowała dachówka. Chociaż w 1746 r. wewnątrz miasta znajdowało się jeszcze 10 budynków krytych strzechą<sup>8</sup>. Tak jak modernizowały się domy, co było w tym okresie w miastach pruskich ogólną tendencją, zmieniał się również wygląd ulic. W 1750 r. zniknęła ostatnia stodoła<sup>9</sup>.

W niniejszym artykule zostaną przedstawione źródła<sup>10</sup> dotyczące gospodarstw miejskich z połowy XVIII w., zatem z okresu dużego rozwoju miasta w dobie wczesnonowożytnej. Nie zostały one odnotowane ani w kronice węgorzewskiej<sup>11</sup>, ani w pracy poświęconej obywatelom autorstwa Rolanda Seeberg-Elverfeldt<sup>12</sup>. Spisy te mają charakter urzędowy, przypominający spis komunikujących. Zamiast jednak sporządzać go według gospodarstw domowych, w tym przypadku wykonano według poszczególnych domostw, gdzie obok siebie mieszkać mogło kilka rodzin komorniczych. W tabelach trudno jest zidentyfikować głowę gospodarstwa oraz stosunek poszczególnych osób do siebie ze względu na brak odpowiednich informacji. Rejestr obejmuje całość populacji, a nie jak w przypadku spisu komunikujących tylko od pewnego wieku, w podziale na trzy podstawowe kategorie: gospodarze (z uwzględnieniem stanu cywilnego), dzieci, służba. W przypadku małżeństw regułą było podawanie nazwiska, bez podawania imion. W przypadku domów zamieszkiwanych przez co najmniej dwie rodziny można określić przynależność dzieci. Te ostatnie charakteryzowane były wedle wieku (poniżej/powyżej 12 lat) oraz płci. Sposób ten odpowiada zapisom, które stosowano w katastrze fryderycjańskim sporządzanym na Warmii w 1773 r.<sup>13</sup> Mechanizm i zro-

zumienie tego zapisu umożliwia wprowadzanie pod koniec spisu z 1752 r. rejestracji wieku dzieci. Informacja ta są jednak niezmiernie szcątkowe, bo dotyczą tylko części spisu, na dodatek – nie zamieszczano ich regularnie. Dowiedzieć się można jednak dzięki temu, jak rozumiano poszczególne kategorie wiekowe. Pierwsza jest dość oczywista, wpisywane najmłodsze dzieci miały pół roku. Ciekawa natomiast jest górna kategoria wiekowa. Najstarszy syn miał 38 lat, córka 33, to są przypadki skrajne. Częste jednak były wpisy lat około 20 roku życia. Dzieckiem zatem była każda osoba niesamodzielna finansowo, pozostająca w zależności materialnej i będąca spokrewniona w pierwszym stopniu z głową rodziny. Nawet 21-letni syn mógł pozostawać pod opieką matki, wdowy.

Według charakteryzowanych dokumentów, Węgorzewo w 1752 r. zamieszkiwało 1659 osób, natomiast w 1754 r. odnotowano spadek do 1551. Ewidentnie zauważyć można całe puste domy, w liczbie znacznie większej niż poprzednio. Analizując spis dostrzec można, że odpływ miał miejsce praktycznie we wszystkich kategoriach ludności. Na tym samym poziomie ukształtowała się tylko liczba czeladników i gospoś. Sumaryczne zestawienie danych przedstawia tabela 2. W spisie z 1752 r. łatwo zauważyć różnicę w ilości gospodarzy a gospoś. Tak odnotowano w trzech przypadkach. Wśród osób samotnych przeważają wdowy. W 1752 r. wdowcy stanowili zaledwie nieco powyżej jednego procenta populacji, a wdowy już ponad 4,5%, analogicznie w 1754 r. było to odpowiednio 0,45% i 3,8%. Poniższe spisy dostarczają również ważnych informacji dotyczących struktury zaludnienia domów w Węgorzewie. Ludzie zamieszkiwali praktycznie każde dostępne miejsce, łącznie z browarem. Warto odnotować, że w 1752 r. aż 38,5% (w 1754 – 26,5%) mieszkańców mieszkało z osobami spoza najbliższej rodziny, często obcymi. Przypadki zamieszkiwania dwóch rodzin pod jednym dachem należały do najczęstszych. Najem stanowił zatem dla niektórych sposób na uzupełnienie rodzinnego budżetu, a dla niektórych, jak burmistrz Drygalski, dochodowy interes. Klóci się to z tezą o dużej ilości małżeństw z liczną gromadką dzieci w domach jednorodzinnych<sup>14</sup>. Jak wynika z poniższych danych, w różnych okresach na rodzinę przypadało statystycznie średnio od 2,2 do 2,4 dziecka. Liczne narodziny i poczęcia nie oznaczały w dobie wysokiej śmiertelności dużej liczby dzieci. Takie rodziny były stosunkowo rzadkie.
